112040051 - Bachelor of Nursing (2018)

0051007 - Documentation and ICT (taught in English)

Dades generals

Codi:	0051007
Tipus:	OB
Semestre:	2
Crèdits:	3.0
Llengua d'impartició:	Anglès

Professorat

Professorat responsable

Esqué Boldu, Sara (Titulació: Diplomatura en infermeria, Màster en tecnologia educativa i Doctorat en infermeria; Àrea de coneixement: Ciències de la salut; Grup de recerca: Grup de recerca interdisciplinari en educació)

Professorat que imparteix

Perez de Ciriza Villacampa, Carmen (Titulació: Doctorat; Àrea de coneixement: Ciències de la salut)

Informació

Presentació de l'assignatura:

The subject of Documentation and ICT works the bibliographic search from different reliable sources based on critical reading.
Evidence based medicine and scientific method are the basis for rigorous work that leads to nursing profession development and improvement. From the beginning of the subject, the student is given the necessary tools to apply and use during the rest of their training and professional life, considering that we are part of the knowledge society.
The importance of work based on a methodology makes the profession develop with coherence and rigor.
Information and Communication Technology (ICTs) adds value to the existing

methodology and management of the information in order to create documents and analyze and data.

This is a subject of the second semester, which establishes research basis. It continues in Public Health and Nursing Leadership, working the research in a transversal way.

Objectius:

• To identify and apply the parts of structured documents correctly

• To know and use ICT tools, in order to be able to communicate, present and search for information

• To identify and evaluate relevant information obtained from sources and information systems

• To identify the necessary health and / or disease data, in order to properly complete the clinical records

Metodologia:

Different activities are performed in this subject:

• teaching activities, dedicated to lectures by teachers.

• supervised activities, dedicated to applying the knowledge learned, using the computer laboratories.

• use of the virtual campus as a tool for communication and practice.

Avaluació continuada:

The continuous assessments include three parts: EOCs, oral presentation and written project.

It is compulsory to have at least a minimum score of 5 in the written part to pass the continuous assessment.

Otherwise, students will have the option to perform final evaluation.

Avaluació final:

The student who does not pass the continuous assessment activities will have the option to perform the final evaluation. A theoretical and practical exam (a given example to develop) would be carried out. A multiple-choice test with four options and an example to develop the practical concepts develop in class but in a theoretical landmark.

As the complexity would be different from the continuous assessment, the maximum score could be a 5.

Bibliografia bàsica:

- Gerrish, K, Lathlean J. (2015). The Research Process in Nursing (7 th ed.), Wiley.
- Polit, D. and Tatano C. (2018). Essentials of nursing research: Appraising evidence for nursing practice. (9 th ed.), Denise F. Polit, Cheryl Tatano Beck. Ninth Edition Wolters Kluwer Health.
- Gray, J. Grove, S. and Sutherland S. (2016). The practice of nursing research: Appraisal, synthesis and generation of evidence. (8 th ed.), Elsevier.

Observacions:

The teaching staff reserves the right to make an oral test about any delivery to validate the final mark, both in continuous evaluation and final evaluation.

Competències específiques

No hi ha competències específiques a visualitzar.

Competències transversals (3)

Codi - Competència transversal	Àrea
UdA05 - TIC	Gestió del coneixement i autonomia en el treball
UdA06 - Tractament de la informació	Gestió del coneixement i autonomia en el treball
UdA10 - Comunicació i expressió oral i escrita	Comunicació

Continguts (11)

1. Introduction to research

    1.1. Evidence based practice

    1.2. Scientific search and bibliographical sources

    1.3. Search, collection and analysis of information

    1.4. Reading and analysis of articles

    1.5. Communication

    1.6. Record of health data

2. Presentation of information through ICT tools

    2.1. Preparation of oral and written presentations

    2.2. Information processing

    2.3. Communication and dissemination

Activitats (2)

Codi - Activitat	Descripció	Competències	Percentatge
2 - Written presentation, oral defense of research pro	Written presentation	UdA05, UdA06, UdA10	50,00%
3 - Results Table	Table	UdA05, UdA06	50,00%
